

Basics

- copy and modify sample.t2t; sample.sty (margins, header, size of paper, the size and name of the font...). Define `export TEXTALLION-DOC=your_document_name` or modify the makefile then :
- make pdf (needs LaTeX); make html (or make slidy for html slide show); make epub (needs calibre)
 - or make pdfsmall : a document with 2 pages in one (needs pdftjam)
 - or make booklet : a recto-verso leaflet (needs psutils).
- make clean; make cleanall; make clean-everything
- make all : html, pdf, epub and clean temporary files.

Special characters and features
